

Technical Interview Prep for TAs

First questions each interviewer should ask - please ask 2-4 of them

- How did your education prepare you for a job in Cybersecurity?
- What do you do to maintain your skills and knowledge in the field?
- How would you rate your key competencies for a role in Cybersecurity?
- Tell me about the most recent project you worked on. What were your responsibilities?
- Tell me about the project you are most proud of, and what your contribution was.

Here is what the student/graduate receives before their scheduled time with you

The technical interview is more like an exam than just a typical interview might be. This is your opportunity to show the employer that you have the skills and tenacity to do the work in the Cybersecurity field. The employer wants to see how you can tackle real world problems and show the following:

What are the interviewers looking for:

Passion and enthusiasm for Cybersecurity

Excellent communication Skills

Capacity to Learn and Grow

Humility - you still have the passion and purpose to learn on the job and in your career

Hunger- you want to learn and grow and test your skills in the real world

Please use this practice as a way to help you prepare and practice; practice makes better and better.

Please treat this as if it were a real interview:

- Be on time
- Test your Zoom, lighting, and microphone ahead of time
- Dress to impress
